

# Montageanleitung

P001S  
Leitungsträger-Bohrsablonen-Set

Klebescheibe auf Leitungsträger kleben und Schutzfolie abziehen.

Leitungsträger auf Trockenwand befestigen und Leitungen oder Rohre durch Bügel führen.

Angeschrägten Dorn durch zweite Gipskartonplatte drücken, ggf. vorher mit Hammer Loch einschlagen.

Leitungsträger mit Zange bündig zur Wand abwickeln.

Dosenfräser im Zentrierbohrloch ansetzen und Loch ausfräsen.

Leitungsträger mit befestigten Kabeln oder Rohr aus der Öffnung ziehen.

Hohlwanddose montieren,  
Einbaugerät oder Steckdose installieren.

Einfache Deckenmontage zur Leitungsführung: aufkleben und fertig!

# Assembly instruction

P001S
